

Frico Engineering - New Structure

Frico is the leading supplier of Air Curtains in Europe, with a wide range of energy efficient products branded Frico and Gelu. Due to structural changes, production of specific ranges of air curtains is moving from Germany to Frico Engineering in Sweden.

The Competence centre in Frico Engineering offers a peak competence within Air Curtains and long experience in production. Good logistics and well developed distribution network, with warehouses in Netherlands and central Germany, provides high level of accessibility.

Since 1970, Frico have experience within production of Air Curtains. By acquisition of Gelu 2004, competence within tailor made Air Curtains was added. By combining skills in handicraft and high-quality production process, Frico Engineering offers the European market Air Curtains with consistently high level of quality.

The close cooperation with Fricos R&D, Europe's most modern development centre, makes it easy to test prototypes. High flexibility in the production process makes it possible to combine resources within the Frico-group and offer an optimal solution and possibility to fast production of bigger volumes

Gerlinde Fuss, technical manager, Frico GmbH, in production meeting with the staff at Frico Engineering.

About Frico
